## 1 Features

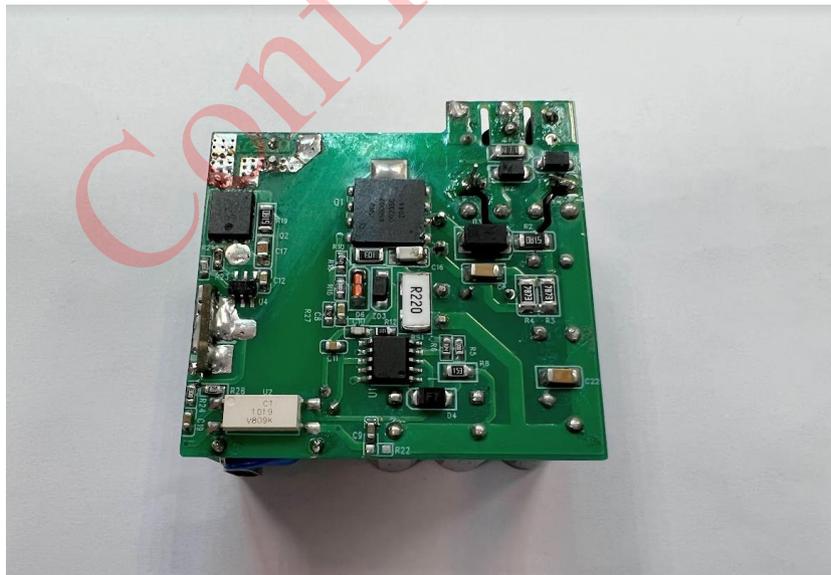

- Small Factor: 43mm x 43mm x 22mm.
- WT7162RH PWM controller and WT7131A SR controller work with WT6636F PD controller to be a total solution with cost effectiveness and high performance.
- Have excellent efficiency because WT7162RH has the high frequency DCM with valley switching.
- Have a better efficiency at 20V output and the tiny load 0.25W and 0.5W for Notebook adaptor due to the PWM controller WT7162RH providing the wide 3.3V~21V PPS outputs without extra LDO at the supply pin.
- Adjust output voltage and current profile accurately with 20mV voltage step and 50mA current step by the PPS mode of WT6636F.
- Meet CoC V5 Tier2.
- No load input power < 75mW.
